Experiment 1: ATM System

Objective: Select any stem, such as ATM System, and throughly examine its system specifications to identify & document the different software defets present

Features to be tested:

1. validity of the card
2. Withdraw transcation flow of ATM
3. Authentication of the users
4. Dispense the Cas from the account.

Common software defects

Bug ID	Bug Name
ATM 001	Invalid card
ATM 002	invalid PIN
ATM 003	Invalid account type
ATM 004	insufficient balance
ATM 005	transcation Limit exceeded
ATM 006	Daily withdrawl Limit
ATM 007	invalid amount denomination
ATM 008	Receipt not printed
ATM 009	PIN change mismatch

Bug reports

Bug ID: ATM 001
Bug description: Invalid Card
Steps to reproduce: insert a valid ATM Card.
Expected Result: welcome screen should be displayed
Actual result: -invalid

Bug Id: ATM 002
Bug description: Invalid PIN entered
Steps to reproduce
→ Keep a valid card in ATM
→ Enter PIN
Expected result: Menu screen displayed
Actual result: Invalid PIN screen displayed
Status: Pass | Fail

Bug Id: ATM 003
Bug description: Invalid account type selected
steps to reproduce:
→ Enter valid PIN
→ select withdraw option
Expected: Enter Amount screen
Actual: Invalid Account type screen
Status: pass | fail

Bug Id: ATM 004
Bug description: insufficient balance
steps to reproduce:
→ Menu screen → select correct typeacc
→ select withdraw → Enter sufficient amount
Expected: Collect amount screen
Actual: insufficient balance
status: pass | fail

Bug Id: ATM 005
Bug description: withdraw Limit per transcation
steps to reproduce:
→ select withdraw option
→ Enter sufficient amount
→ dispense the cash screen & amount to deducted
Expected: Cash is dispensed & collect receipt
Actual: Transcation limit exceeded
status: pass | fail

Experiment 2: ARMS PORTAL - positive test cases

Objective: To identify and analyze the requirements of the ARMS portal & prepare positive test scenarios & test cases

Requirements to be tested:

1. User login & authentication
2. Viewing student profile details
3. Checking attachment details
4. Viewing examination results

Test case Id : ARMS 001

Test description: Valid user login

Steps to reproduce

→ Open ARMS Portal login
→ Enter reg username
→ Enter password

Expected result: User should log in successfully

Actual result: Dashboard displayed successfully

status: pass/fail

Test case Id: ARMS 002

Test description: View student attendance

Steps to reproduce:

→ Login with credentials
→ navigate to attendance section
→ View attendance details

Expected result: Attendance percentage should display subject wise

Actual: Attendance details displayed sub-wise

test status: Pass/fail

Experiment 3: ARMS PORTAL – Negative test Cases

Objective: To Identify & analyze the Requirements of ARMS portal and prepare negative test cases

Requirements to be tested:

1. Invalid login Credentials
2. Empty input fields
3. Invalid student ID
4. unathorized access to student records

Test case report:

test case Id : ARMS 003

Test description: Invalid password

steps to reproduce:

1. Open ARMS login portal
2. Enter a valid username
3. Enter incorrect password

Expected result: An invalid credentials message should display

Actual: Error msg displayed . login is prevented

Status: pass/fail

Test case Id: ARMS 004

test description: Empty login fields

steps to reproduce .

1. Open ARMS portal
2. Leave the username & password fields empty
3. Click login button

Expected result: Validation msg should displayed

Actual result: Validation msg displayed.

Status: pass/fail

Experiment 4: E-commerce Application - positive test cases

Objective: To identify and analyze the requirements of an E-commerce Application and prepare positive test cases

Requirements to be tested:

1. User registration & login
2. Product search
3. Adding products to cart
4. Placing orders and complete payment

Test case Id: EC 001

Test description: Search for a product

Steps to reproduce

→ Open e-commerce
→ Enter name of product
→ click search

Expected: Relavent products matching the search displayed

Actual: Relevant products are displayed

Status: pass / fail

Test case Id: EC 002

Test description: Add product to cart

Steps to reproduce:

→ login
→ search product
→ select quantity
→ click add to cart

Expected: The cart should display correct product & quantity

Actual result: product is added to the cart successfully

Status: pass / fail

Experiment 5: E-commerce Application - Negative test Case

Objective: To identify and analyze the requirements of an E-commerce & prepare negative test cases

Requirements to be tested:
-> invalid login
-> invalid product quantity
-> incomplete delivery address
-> failed payment transaction

Test case report:

Test case Id: EC003

Test description: Invalid User login

Steps to reproduce
1 open e-commerce website
2. Naive login-page
3. Enter invalid username or password

Expected: An error message should be displayed

Result: Error msg displayed, login is prevented

Status: pass/fail

Test case Id: EC004

Test description: Invalid product quantity

Steps to reproduce
1. Open e-commerce website
2. Select available product
3. Enter zero or neg quantity

Expected: The application should reject invalid quant

Actual: Validation msg is displayed & product is not added

Status: pass | fail
